Driveaway Awnings & Accessories - 2017

Without Question, The Best Driveaway Awnings for 2017...

Outdoor Revolution has created the ultimate, most innovative and reliable products for 2017 to ensure the very best experience of the great outdoors.

Established in 2003, Outdoor Revolution is the pioneering brand of the driveaway awning and have continually led the market with technological advances, to maintain the status as the most aspirational manufacturer in the Campervan & Motorhome driveaway awning industry.

The range for 2017 has taken the very best features of our archived blue prints, to design, manufacture and provide the most aspirational products on the market, whilst offering unequalled value for money...

...Do not settle for second best!

Designed in the UK for the UK...

Our design team has created the most reliable, easy to erect and luxurious products on the market; to echo the changes in outdoor living and our consumer's expectations.

Our mission was simply to create the most desired range of Campervan and Motorhome driveaway awnings, using only the very best fabrics and component parts available.

In our 14 years, we have led the market and continued to evolve our signature designs to ensure we have the most aspirational product available.

Outdoor Revolution hasn't just created driveaway awnings; we have created unique, versatile and flexible additional space for campers to enjoy their leisure time.

Often copied, but never equalled...

**...buy from the innovators,
not the imitators!**

As the Pioneers and Innovators within this field, **Outdoor Revolution** are so confident in the reliability of product with an Intelligent Frame that we offer a ***LIFETIME GUARANTEE** on the Air Tube with an IF Valve...

Inspirational frames & Dura-tech welded products now carry a *3 year tube warranty.

DRIVEAWAY AWNINGS

ACCESSORIES

Why buy an Outdoor Revolution Product?

Following the success of 2016 and in line with our ambitions and ethos, we are determined to continue our mission to create market leading technology with parities in regard to quality; we have dedicated lines of manufacture to ensure consistency of expertise, exceptional quality control processes, combined with an offer of unequalled value for money. We have the most reliable inflation system on the market and best weather proof and fade resistant fabrics. We have introduced some exciting new additions to the current line-up of features, affording true, stand-out products and a must-have brand for the end-user.

Oxygen Air Frame

The EXCLUSIVE Oxygen Air Frame is the quickest, easiest and most reliable inflation system on the market, with no ugly adjoining pipes or taps spoiling the clean lines of our beautiful, simplistic designs. The Oxygen Air Frame incorporates the Dynamic Speed Valve and the patented Intelligent Frame Relief Valve. Inflation is an incredibly speedy process with the dual action pump provided; deflation is just the push of a button. We are the only awning manufacturer to use the Relief Valve, preventing damage to the tube by expelling any excess air, which can be caused by either over inflation or increases in the ambient temperature. The valves are discretely concealed by a Velcro cover.

Condensation Explained

Condensation is a completely natural occurrence which happens when warm air meets cold surfaces forming little water droplets usually on the inside of the fabric; like you may experience on windows at home. An average adults' breath produces 1 litre of water vapour every day which is released into the air; therefore having numerous people sleeping inside will produce a vast amount of water vapour in the air that will condensate. All Outdoor Revolution products are protected with a durable water repellent treatment and all seams are heat sealed. This process prevents water ingress, but can also prevent the moisture trapped in the air inside from escaping, causing condensation. To help ease condensation, we have put air vents on every product and mesh screens on doors, as well as dual zip windows and doors; maximising air flow. We would also recommend taking a micro breathable travel towel to wipe the roof or walls of the product if condensation appears, to speed up the drying process.

Pioneering Technology

Pheonix mesh. is an assisted-healing 'smart' material that has the structurally incorporated ability to repair 'snag' damage caused by usage over time. We have taken the inspiration from biological systems, which have the ability to heal after being injured. Simply manipulated, the mesh will return to its original form.

Dura-tech. welded technology - due to the success of the welded single inflation point, this technology will be expanded in to additional products; providing the most efficient and simple technology on the market. This carries a 3 year tube warranty.

UV Covers. reversible protective roof covers that protect the products fabrics from the harmful rays of the sun, tree sap and bird lime, whilst dramatically reducing condensation by producing a layer of air between the roof and the cover. The reversibility works to either reflect heat or retain heat within the product.

Pro.Climate.

Climate Fabric incorporates years of learning to provide a high performing man made fibre with the breathability of polycotton. This superior fabric provides the ultimate performance of any awning fabric, marrying the water repellent properties of polyester with the comfort of natural fibres. We are the first commercial manufacturer to introduce this fabric. Another first for Outdoor Revolution.

150^{HD} drs Endurance.

This exceptional High Density fabric is used by Outdoor Revolution on product where weight, pack size and speed is of the essence. The 150 High Density fabric gives unparalleled benefits, in terms of strength to volume and weight. The engineered double rip-stop gives a contemporary look and feel, as well as providing the user with unequalled performance compared to similar weight fabrics.

250^{HD} drs Endurance.

The double rip-stop in the 250 High Density fabrics ensures the optimum strength to weight ratio of any fabric. All of the Outdoor Revolution fabrics are woven using the latest textile manufacturing techniques to provide the longevity and performance of much heavier denier fabrics without the impracticality and constraints of their weight. Fade resistance and longevity is guarenteed to give the costomer a quality performing product at an affordable price.

68^{HD} Hex® Endure.

This highly technical lightweight high density fabric is designed to have an optimum weight to strength ratio. Woven using the latest textile manufacturing techniques to provide the longevity and performance of much heavier denier fabrics.

MOVEAIRLITE CLASSIC

150^{HD} drsEndurance.

Weight loading: 100kgs

The **TECH-PEG** is a technical tent peg, designed with a tough double sided peg head for holding guy lines and pegging down points safely and securely. The twisted nail shaft helps to achieve better grip and easier insertion into awkward ground. Sold conveniently in their own durable storage box with integrated peg cleaner in the box lid for cleaning dirty pegs before putting them away.

The **DELUXE STORM KIT** incorporates all you need to secure your awning or tent in awkward, stormy conditions. The kit includes 15 Tech-Pegs for easy pegging and firm hold, 2 adjustable Endurance Storm Straps and a cleverly designed, curved handled mallet, ergonomically designed to aid when placing pegs at awkward angles.

The **ANGLE MALLET** is cleverly designed to help place pegs into the ground at the correct angle. The weighted mallet head makes light work of placing pegs into hard ground. Incorporating a handy peg puller at the end of the handle.

The **MULTI MALLET** is a technical mallet with multi functional features that make it a 'must have' camping accessory for everyone. Incorporating an extending peg puller to help prevent back ache caused by bending over when extracting pegs. This conveniently retracts back into the lightweight alloy handle when not in use. A convenient brush peg cleaner can be accessed to clean up those dirty pegs before putting them away. A weighted rubber mallet head makes light work of knocking pegs into hard ground.
